Hikmal Alfatih

Apple Device Hardware Technician | Board-Level Repair Specialist | AI-Powered Productivity

West Jakarta, Indonesia | +62 819-0303-1378 | hikmalalfatih05@gmail.com | linkedin.com/in/hikmalalfatih

Professional Summary

Apple device hardware technician with over three years of hands-on experience repairing iPhone, iPad, MacBook, and Apple Watch, progressing from interface-level repair to advanced mainboard-level repair. Currently working as a Machine Expert at Applenesia, specializing in chip-level diagnostics, IC replacement, reballing, soldering, and repair of completely dead (no-power) iPhone and iPad units. Detail-oriented and precision-driven, with a strong commitment to reliable, lasting repairs rather than quick fixes. Pursuing a degree in Information Systems and skilled at using AI tools to work more efficiently, including GitHub Copilot for building websites and effective prompts that enable AI to handle complex, demanding tasks, while staying current with the latest advancements in device hardware and repair techniques.

Core Skills

Hardware Diagnostics & Repair: Troubleshooting, Chip-Level Diagnostics, Component-Level Repair, Mainboard (Logic Board) Repair, Machine and Board Troubleshooting, Dead Device (No-Power) Repair

Board-Level Techniques: IC Replacement, Reballing, Soldering, ACP (Angkat Cetak Pasang / Lift-Print-Install), Swap Board

Interface & Installation: Hardware Installation, LCD Replacement, Battery Replacement, User Interface Repair

Apple Devices: iPhone, iPad, MacBook, Apple Watch

Professional Strengths: Attention to Detail, Precision, Problem Solving, Customer Communication, Sales Strategy, Continuous Learning

AI & Productivity: GitHub Copilot, AI-Assisted Web Development, Prompt Engineering, Generative AI Tools, AI-Assisted Workflow Optimization, Productivity Optimization, Process Efficiency

Professional Experience

Machine Expert (Board-Level Repair Technician) | Applenesia

Bandung, West Java, Indonesia | September 2025 - Present

- Diagnose and repair complex mainboard-level faults on iPhone and iPad, going beyond surface-level repairs such as cracked screens, leaking batteries, and broken buttons.
- Restore completely dead (no-power) iPhone and iPad units through chip-level diagnostics and component-level repair.
- Perform IC replacement and ACP (Angkat Cetak Pasang / Lift-Print-Install) procedures on logic board components.
- Carry out reballing and precision soldering to bring damaged boards back to full performance.
- Perform swap board (logic board replacement) procedures on Apple devices.
- Deliver precise, reliable repairs that provide lasting solutions rather than quick fixes.

Interface Expert (Apple Device Repair Technician) | PT. Eka Putra Berkat

Bandung, West Java, Indonesia | November 2023 - September 2025

- Replaced and installed LCD screens, batteries, and user interface components on iPhone, iPad, MacBook, and Apple Watch.
- Diagnosed and resolved common hardware issues, including cracked screens, battery failures, and broken buttons.
- Applied troubleshooting skills across four Apple product lines to restore devices to full working condition.
- Performed accurate hardware installation of replacement components with close attention to detail.

Interface Expert (Apple Device Repair Technician) | PT. iColor Digital Indonesia

West Jakarta, Indonesia | October 2022 - July 2023

- Replaced LCD screens, batteries, and user interface components on iPhone, iPad, MacBook, and Apple Watch.
- Repaired cracked screens, leaking batteries, broken buttons, and other hardware issues across Apple product lines.
- Performed precise hardware installation to restore devices to full functionality.

Account Executive | MyRepublic ID

Jakarta, Indonesia | April 2022 - September 2022

- Designed effective sales strategies to promote and sell WiFi solutions to customers.
- Engaged customers to understand their connectivity needs and recommend suitable WiFi solutions.
